Safety Data Sheet
Petroleum Wax

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier
Substance name: Paraffin wax (petroleum), hydrotreated
EC No. (EINECS No.): 265-154-5
CAS No.: 64742-51-4
Date Issued: 11/15/16
Revision Date: 9/23/20

1.2. Relevant identified uses of the substance or mixture and uses advised against
1.2.1. Relevant identified uses: Laboratory test sample
1.2.2. Uses advised against: No additional information available.

1.3. Details of the supplier of the safety data sheet
Clark Laboratories
1801 Route 51 South
Jefferson Hills, PA 15025
412-387-1001

1.4. Emergency telephone number
Chemtrec 24 hour emergency response: (800)424-9300
International Collect: +1 703 741 5970
SDS Assistance Email: sds@clarktesting.com

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture
2.1.3. Additional information
No additional information available.

2.2. Label elements
2.2.1. Labeling according to Regulation (EC) No. 1272/2008 [CLP/GHS] No labeling applicable.
2.2.3. Additional information
Caution: Combustible, Contact with molten material will cause thermal burns

HMIS- Health: 0  Flammability: 1  Reactivity: 0
2.3. Other hazards
This substance does not meet the PBT/vPvB criteria of REACH, annex XIII.

Environmental hazards: This substance is biodegradable and does not contain any component above 0.1% w/w which is considered carcinogenic by OSHA, IARC or NTP.

Other hazards which do not result in damage, and classification: High concentration of vapors may cause serious lung damage, and may induce headache, nausea, dizziness.

SECTION 3: Composition/information on ingredients
3.1. Substances

3.2. Mixtures
Not applicable.

SECTION 4: First aid measures
4.1. Description of first aid measures
First-aid measures after inhalation: Remove victim to fresh air and keep at rest in a position comfortable for breathing. In case of breathing difficulties administer oxygen. In case of irregular breathing or respiratory arrest provide artificial respiration. If medical advice is needed, have product container or label at hand.

First-aid measures after skin contact: If contacted with hot material, take off all contaminated clothing immediately. Rinse skin thoroughly with plenty of water for at least 20 minutes and take medical advice. If medical advice is needed, have product container or label at hand.

First-aid measures after eye contact: If heated material should splash into eyes, rinse immediately and plentifully with water, also under the eyelids, for at least 20 minutes. Seek immediate medical advice. If medical advice is needed, have product container or label at hand.

First-aid measures after ingestion: If swallowed, do not induce vomiting. Seek medical advice immediately and show the container label. If swallowed, do not induce vomiting. Rinse mouth with water (only if the person is conscious). Drink plenty of water.
4.2. Most important symptoms and effects, both acute and delayed
Symptoms/injuries after inhalation: High concentration of vapors or fumes from molten substance may induce:
- headache, nausea, dizziness. Irritant effect on the respiratory tract.
Symptoms/injuries after skin contact: Slightly irritating to skin. Prolonged/repetitive skin contact may cause skin defattening or dermatitis. Heated product causes burns. Symptoms/injuries after eye contact: Slightly irritating to eyes.
Symptoms/injuries after ingestion: Nausea.

4.3. Indication of any immediate medical attention and special treatment needed
Following contact with the molten substance, quickly cool affected skin area with water.

SECTION 5: Firefighting measures
5.1. Extinguishing media
Suitable extinguishing media: Carbon dioxide (CO₂), dry chemical powder, foam, or water fog.

5.2. Special hazards arising from the substance or mixture
Fire hazard: Apply aqueous extinguishing media carefully to prevent frothing/steam explosion.
Reactivity: On combustion, may form: carbon dioxide (CO₂), sulfur dioxide (SO₂), Nitrogen oxides (NOₓ), and carbon monoxide (CO).

5.3. Advice for firefighters
Firefighting instructions: Cool tanks/drums with water spray/remove them into safety.
Protective equipment for firefighters: In case of fire: Wear self-contained breathing apparatus. Refer to Section 8.

SECTION 6: Accidental release measures
6.1. Personal precautions, protective equipment and emergency procedures
General measures: If the substance is molten, use water spray/stream to protect personnel and to cool endangered containers. Emergency cooling must be provided for in case of fire. Wear protective clothing and equipment. Avoid contact with molten substance. Keep unprotected persons away. Ensure adequate ventilation.

6.1.1. For non-emergency personnel
Protective equipment: Wear suitable protective clothing, gloves and eye/face protection. Refer to Section 8. Emergency procedures: Remove all sources of ignition. Stop leak if safe to do so.

6.1.2. For emergency responders
Protective equipment: In case of fire, wear self-contained breathing apparatus (SCBA).
Wear suitable protective clothing, gloves and eye/face protection. Refer to Section 8.
Emergency procedures: Evacuate unnecessary personnel. Remove all sources of ignition. Stop leak if safe to do so.
6.2. Environmental precautions
Avoid release to the environment. Contaminated fire-fighting water must be collected separately. Prevent spreading over great surfaces (e.g. by damming or installing oil booms).

6.3. Methods and material for containment and cleaning up
6.3.1. For containment
Stop leak if safe to do so. Eliminate leaks immediately.

6.3.2. For cleaning up
Collect in closed containers for disposal. Absorb with liquid-binding material (e.g. sand, diatomaceous earth, acid- or universal binding agents). If the substance is molten, cool down with water and allow it to solidify.

6.3.3. Other information
Relevant water authorities should be notified of any large spilage to water course or drain.

6.4. Reference to other sections
If appropriate, Sections 8 and 13 shall be referred to.

SECTION 7: Handling and storage
7.1. Precautions for safe handling
Precautions for safe handling: Handle in accordance with good industrial hygiene and safety procedures. Use only in well ventilated areas. Use personal protective equipment as required. The melted product can cause severe burns.

7.2. Conditions for safe storage, including any incompatibilities
Technical measures: Floors should be impenetrable, resistant to liquids and easy to clean. TheFloor should be leak tight, jointless and not absorbent.

Incompatible materials: Strong oxidizing agents.

Storage area: Keep away from open flames, hot surfaces, sources of ignition, and humid air. Do not store near oxidizing agents. Store in a dark area. Only use anti-static equipped (spark-free) tools. Ensure the grounding of containers, apparatus, pumps and suction equipment. Floors should be impenetrable, resistant to liquids and easy to clean. The floor should be leak tight, jointless and not absorbent.

7.3. Specific end use(s)
No additional information available.

SECTION 8: Exposure controls/personal protection
8.1. Control parameters

<table>

</tr>
</tbody>
</table>
8.2. Exposure controls

8.2.1. Appropriate engineering controls
Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure. Provide adequate ventilation. Do not eat, drink or smoke when using this substance.

8.2.2. Personal protective equipment
Take off contaminated clothing and wash before reuse. Used working clothes should not be used outside the work area. Wear protective gloves and eye/face protection.

9.2. Other information
No additional information available.

SECTION 10: Stability and reactivity

10.1. Reactivity
No reactivity danger exists.

10.2. Chemical stability
Stable under recommended storage and handling conditions.

10.3. Possibility of hazardous reactions
No hazardous reactions are possible.

10.4. Conditions to avoid
Creation of concentrations within the explosion limits, presence of ignition sources and contact with a naked flame.

10.5. Incompatible materials
Strong oxidizing agents.

10.6. Hazardous decomposition products
Under normal conditions: none. On combustion, may form: carbon dioxide (CO₂), sulfur dioxide (SO₂), nitrogen oxides (NOₓ), or carbon monoxide (CO).

SECTION 11: Toxicological information

11.1. Information on toxicological effects
Acute toxicity: No data available.

<table>
<thead>
<tr>

</tbody>
</table>

Skin corrosion/irritation: Solid material is not expected to be a skin irritant; however, skin contact with molten wax may cause thermal burns. No harmful effects from skin absorption are expected.

Serious eye damage/irritation: Solid material is not expected to be an eye irritant; however, contact with substance may cause thermal burns. Vapors from molten substance may cause watering of the eyes.

Respiratory or skin sensitization: No data available.
Germ cell mutagenicity: No data available.
Carcinogenicity: No data available.

Reproductive toxicity: No data available.
Specific target organ toxicity (single exposure): No data available.
Specific target organ toxicity (repeated exposure): No data available.

<table>
<thead>
<tr>

</tr>
</thead>
<tbody>
<tr>
<td>NOAEL (oral, rat, 90 days)</td>
<td>1500 mg/kg bodyweight/day</td>
</tr>
<tr>
<td>NOAEL (dermal, rat/rabbit, 90 days)</td>
<td>2000 mg/kg bodyweight/day</td>
</tr>
</tbody>
</table>

Aspiration hazard: No data available.
Potential Adverse human health effects: The molten substance can cause severe burns. High concentration of and symptoms. Vapors may cause serious lung damage, and may induce headache, nausea, dizziness.

Environmental fate: Petroleum-based (mineral) waxes normally will float on water. In stagnant or slow-flowing waterways, a wax layer can reduce the atmospheric oxygen exchange with the water system. If the wax layer is not removed, oxygen depletion can result in loss of marine life.

SECTION 12: Ecological information

12.1. Toxicology

Ecology – general substance: When used and handled according to specifications, the substance does not have any harmful effects according to our experience and the information provided to us.

<table>
<thead>
<tr>

</tr>
<tr>
<td>NOEC (chronic)</td>
</tr>
</tbody>
</table>

12.2. Persistence and degradability

Paraffin wax (petroleum), hydrotreated
Persistence and degradability: Not expected - the substance is not soluble in water.

12.3. Bioaccumulative potential

Paraffin wax (petroleum), hydrotreated
### 12.4. Mobility in soil

<table>
<thead>
<tr>
<th>Paraffin wax (petroleum), hydrotreated</th>
<th>Ecology - soil</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Not expected - the substance is biodegradable.</td>
</tr>
</tbody>
</table>

### 12.5. Results of PBT and vPvB assessment

<table>
<thead>
<tr>
<th>Paraffin wax (petroleum), hydrotreated</th>
</tr>
</thead>
<tbody>
<tr>
<td>Not expected because of the composition and low solubility in water.</td>
</tr>
</tbody>
</table>

### 12.6. Other adverse effects

The formation of product layers on water surfaces prevents the access of oxygen.

### 12.7. Additional information

No data available.

### SECTION 13: Disposal considerations

#### 13.1. Waste treatment methods

Waste disposal recommendations: Consult the local waste disposal expert about waste disposal. Dispose of this substance and its container to hazardous or special waste collection point. Disposal must be done according to official regulations.

Additional information: When used and handled according to specifications, the product does not have any harmful effects according to our experience and the information provided to us.

### SECTION 14: Transport information

Under normal situation for shipment at ambient temperature, the substance is in stable solid form. It is not considered dangerous in sense of transport regulations.

### SECTION 15: Regulatory information

#### 15.1. Health, safety, and environmental regulations/legislation specific for the substance or mixture

15.1.1. EU regulations

- EU – European Inventory of Existing Commercial chemical: Substance is listed.
- Substances (EINECS)
- EU – Regulation (EC) No. 1907/2006 [REACH] as amended: None of the components are listed (SVHC).
- EU – Directive 2005/69/EC [RoHS] as amended: None of the components are listed.
- EU – Directive 2011/65/EU [RoHS2] as amended: None of the components are listed.
15.1.2. Other regional/national regulations
OECD – List of High Production Volume Chemicals: Substance is listed.
US – Toxic Substance Act (TSCA): Substance is listed.
US EPA – High Production Volume (HPV) Challenge: Substance is listed.

Program Chemical List
US FDA – Code of Federal Regulations (CFR) for food and drugs – petroleum wax: Substance meets the UV absorbance limits described in CFR 172.886b. It may be safely used as food additives.
Canada – Domestic Substances List (DSL): Substance is listed.
Japan – Existing and New Chemical Substances (ENCS): Substance is listed.
Korea – Existing Chemicals List (ECL): Substance is listed.
China – Inventory of Existing Chemical Substance (IECSC): Substance is listed.
Taiwan – National Existing Chemical Inventory (NECI): Substance is listed.
Philippines – Inventory of Chemicals and Chemical Substances (PICCS): Substance is listed.
Australia – Inventory of Chemical Substances (AICS): Substance is listed.
New Zealand – Inventory of Chemicals (NZIoC): Substance is listed.

15.2. Chemical safety assessment
Chemical safety assessment has not been established. The substance is not classified as dangerous under normal conditions.

SECTION 16: Other information
Exposure scenarios: Not required.
Sources of key data: Limdon Specialty Pte Ltd. MSDS
